Jose Morales

DevOps, SRE & AI Automation Engineer

linkedin.com/in/jfrmorales · github.com/jfrmorales · jfrmorales.github.io · Santander, Spain (Remote)

PROFESSIONAL SUMMARY

DevOps & SRE engineer with 9+ years in IT and 5+ years running production infrastructure on AWS for product companies such as Fever and The Knot Worldwide. I design highly available AWS architectures, run containerized workloads on Kubernetes (EKS), codify everything with Terraform and build the CI/CD pipelines teams ship through. I bring AI into that work: AI-assisted infrastructure coding, n8n automation and MCP integrations, and I build and self-host my own LLM-powered products end to end.

TECHNICAL SKILLS

AI & GenAI	n8n · Claude Code · Cursor · GitHub Copilot · LLMs (Claude, Gemini, Gemma, Qwen) · LangGraph · MCP · ComfyUI · Stable Diffusion
Cloud & Infrastructure	AWS · OpenStack · Linux · Windows Server · CloudFront · WAF · Nginx · Apache
IaC & Configuration	Terraform · CloudFormation · Ansible · Sceptre · Puppet · Packer
Containers & Orchestration	Kubernetes · Docker · EKS · ECS · Helm · Istio · Docker Compose
CI/CD	GitHub Actions · Jenkins · ArgoCD · GitLab CI · SonarQube · Git · Bitbucket
Observability & Databases	Grafana · InfluxDB · PostgreSQL · MySQL · Oracle · Redis · ElasticSearch · MongoDB · DynamoDB
Development & Scripting	Python · Bash · TypeScript · JavaScript · SQL · React · Next.js · Node.js
Networking & Methods	TCP/IP · Wireshark · Agile/Scrum · JIRA · Confluence

WORK EXPERIENCE

DevOps Engineer — Leadtech

Oct 2023 – Present

Barcelona, Spain

- Drove an automation-first, agile DevOps lifecycle across the engineering organization, aimed at more frequent and safer deployments.
- Designed and maintained high-availability, scalable AWS architectures following the Twelve-Factor methodology and AWS Well-Architected best practices.
- Brought AI-assisted development (Claude Code, Cursor, GitHub Copilot) into daily engineering work, speeding up infrastructure-as-code authoring and incident investigation.
- Built automation workflows with n8n for alerting pipelines, deployment notifications, and cross-platform integrations.
- Owned edge and security hardening: CloudFront CDN, WAF rules and proactive vulnerability remediation.

DevOps Engineer — The Knot Worldwide

Apr 2023 – Oct 2023

Barcelona, Spain

- Provisioned and managed reproducible cloud infrastructure on AWS using Terraform and Sceptre across multiple environments.
- Automated configuration management and deployments with Ansible and Puppet, replacing manual provisioning steps.
- Built CI/CD pipelines with GitHub Actions and Jenkins for faster, more reliable release cycles.

- Orchestrated containerized workloads with Docker and Kubernetes for consistent application deployment.

DevOps/SRE Engineer — Fever Apr 2021 – Oct 2022

Madrid, Spain

- Member of a 6-person SRE team supporting frontend, backend and marketing teams in a fast-growing scale-up.
- Built infrastructure for static frontends and deployed backend microservices on Amazon EKS.
- Managed the end-to-end infrastructure lifecycle with Terraform, Ansible, and Kubernetes on AWS.
- Implemented CI/CD workflows with GitHub Actions and Jenkins, and monitored platform health and reliability with Grafana and InfluxDB.

Earlier Experience

- **Support Engineer**, Excem Technologies — Madrid · Aug – Nov 2020
- **System Administrator**, Aydep Bakery & PLC — Santander · Jan – Jun 2020
- **System Administrator**, Netkia Soluciones — Torrelavega · Sep 2018 – Jan 2020
- **Systems Technician**, Valnera Consultoría — Santander · Jun – Oct 2017

PROJECTS

Futsalite (futsalite.com) — Platform for futsal team management and real-time statistics. Teams handle matches, players, and results in one place. Built with AI-assisted development, self-hosted on a VPS via Docker.

React | TypeScript | Node.js | PostgreSQL | Docker

lauripowerfit (lauripowerfit.com) — Digital ecosystem for a fitness business: client management, personalized routines, and a professional online presence. Built with AI-assisted development and containerized deployment.

Next.js | TypeScript | Tailwind CSS | Node.js | Docker

Ojo de Lince (ojodelince.com) — AliExpress product finder that understands plain-language requests, picks a handful of products and explains why each one fits and how they differ. Hybrid LLM pipeline: Google's Gemini API ranks candidates, with Gemma as fallback, while a self-hosted Qwen handles the rest over a vector index.

Python | Gemini API | Qwen | Vector Search | Docker

Frunk.tv (frunk.tv) — Web hub for the Tesla in-car browser: free-to-air TV, radio, podcasts, news, electricity prices, games and emulators, with phones as controllers. Seven languages and a Telegram Mini App.

FastAPI | JavaScript | Telegram | i18n | Docker

HOMELAB & SELF-HOSTING

Personal infrastructure lab where I try new tools before using them at work: Proxmox · Portainer · Home Assistant · Pi-hole · Traefik · TrueNAS · Plex/Jellyfin · Mini PC Cluster

EDUCATION

- **Bachelor's Degree in Computer Science** — Open University of Catalonia (UOC) · 2017 – 2020
- **Higher Technician Degree in IT Network Administration** — IES Alisal · 2012 – 2014

LANGUAGES

- **Spanish** — Native
- **English** — C1 Reading/Listening · B2 Speaking/Writing · TOEIC 890
